Confirmation of the participation in the Club Transmediale 06

We are confirm participation at Club Transmediale 2006 held in Berlin each year and we are pleased by the interest of the organizers in contemporary electronic scene in Hungary. It is an important opportunity for the hungarian computer music artists to be part of V4 presentation at such a well known international festival where meet artists and concert organizers from all over the world.

The Moiré Assiciation for Culture is a collective of young hungarian computer musicians and sound artists and theoretists. The goal of Moiré is to 1) propagate the hungarian Do-it-Yourself and academical artist-scene on events, on the releases of Dióbél (Walnut Kernel) Recordings and on the Boszorkány radio station of Pécs; 2) to research the aesthetical and technical/sociological background of this (sub)culture, and publish the results on the online Ott (There) text-base.
