## *Letter of confirmation – NESTfest – Brno, 2014*

---

Moiré Association for Culture (Moiré Kulturális Egyesület) is glad to be taking part in the *NESTfest* project as participant. Our role as the partner of the project will consist mainly in realizing a workshop during the event series, mediating and involving hungarian sound artists into. As in the recent years, we'll cooperate in any ad hoc events (live shows, presentations etc) as well.

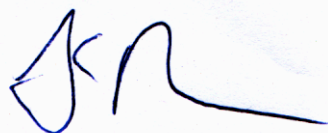

For our association, the cooperation is useful because of the possibility to connect the hungarian experimental music and sound art scene to the other countries' strongly-established cultural web, and it's a possibility for our artists to step through on our limits by contacting with the surroundings.

Moiré is established 2003 for representing and developing the hungarian experimental and computer music scene. We started *Dióbel Recordings* (2002), *Periszkóp Rádió* (2006) and the *Ott* digital music text translation review (2008), organized several events in Pécs, Budapest and Székesfehérvár, some of them with collaboration with universities and cultural associations from Germany (Open Systems of Essen, New Talents Biennale of Cologne, Privatelektro's Headphone Festival of Berlin), Czech Republic (Forum4AM) and France (Aix-en-Provence School of Arts) etc.

We're looking forward to help realize NESTfest.

With best regards,  
Pécs, 03.10.2014.
